SHIZU SECURITY — LOGGING & TRIGGER SPECIFICATION

Version 2.3.0 • High-End Security & Moderation Logging Architecture • Direct Ban & Hierarchy Revert Matrix
Engineered for Server Protection • Developed by **VIPER & PRASHU**

EXECUTIVE SUMMARY & CORE LOGGING POLICY
Shizu Security v2.3.0 streamlines all security operations into a direct, predictable, and zero-clutter paradigm:
• **Zero-Tolerance Anti-Nuke:** Unwhitelisted actors triggering any destructive action are **banned immediately** upon audit log identification.
• **Whitelist Burst Defense:** Whitelisted staff performing rapid destructive actions (≥ 3 in 10s) are treated as compromised tokens and **banned immediately**. Single isolated actions issue an immediate **warning**.
• **Revert on Every Trigger:** 100% of destructive actions are automatically reverted back to the pre-incident snapshot.
• **Hierarchy Defense:** Even if an offender has a higher role hierarchy than the bot (preventing a Discord ban), Shizu **reverts the action regardless** and dispatches an emergency escalation alert.
• **Owner Direct Warnings:** For **EVERY** Anti-Nuke action, the Guild Owner receives an urgent Direct Message containing full forensic logs and security status.
• **Clean 2-Channel Routing:** Only two dedicated channels: #shizu-security-logs and #shizu-mod-logs.

1. Simplified Anti-Nuke Enforcement Workflow

Trigger Event	Actor Status	Action Enforced	Self-Healing Revert	Owner Alert
Any Anti-Nuke Vector (Channel, Role, Webhook, Bot)	**Unwhitelisted** Regular Member / Rogue Admin	**BAN DIRECTLY** All permissions revoked immediately	**100% Revert** Channel/role cloned, webhook deleted	**DM Log + Warn** Instant High-Priority notification
Mass Burst Trigger (≥ 3 actions in 10s)	**Whitelisted** Staff member / Compromised token	**BAN DIRECTLY** Roles stripped + Emergency lockdown	**100% Revert** All nuked assets restored from snapshot	**DM Log + Warn** Urgent Token Hijack escalation
Isolated Action (1 action in 10s)	**Whitelisted** Staff member accidental click	**WARN USER** No ban issued, logged to security	**100% Revert** Sensitive change reversed to protect guild	**DM Log + Warn** Routine security warning to owner
Hierarchy Blocked (Actor role ≥ Bot role)	**Any Unwhitelisted** Server Co-Owner / Higher Role	**FAILOVER TO REVERT** Ban fails due to Discord API 403	**100% Revert** Channel/role recreated without actor perms	**DM ESCALATION** Urgent: Manual owner action required

2. The Discord Bot Hierarchy Defense Mechanism

HOW SHIZU HANDLES MEMBERS HIGHER IN HIERARCHY THAN THE BOT:
In the Discord API, a bot cannot ban, kick, or modify roles of members whose highest role is equal to or higher than the bot's highest role, or the server owner.
The Shizu Defense Solution:
1. **Reverts are independent of Actor Hierarchy:** Re-creating deleted channels, restoring deleted roles, purging unauthorized webhooks, and unbanning victims do *not* require hierarchy over the actor—they only require bot channel/guild permissions.
2. **Instant Self-Healing:** The moment an unwhitelisted superior member nukes an asset, Shizu instantly restores it to pre-incident state.
3. **Immediate Owner Escalation:** Shizu immediately alerts the Server Owner via DM with an [EMERGENCY HIERARCHY ESCALATION] notifying them that Shizu successfully healed the damage, but the offending user must be demoted or banned manually.

3. Complete Anti-Nuke Triggers & Revert Matrix

Every destructive action on the server is intercepted by an event listener, correlated against the Discord Audit Log within 0.12s, and reverted.

Trigger Vector	Audit Action	Detection & Enforcement Mechanism	Automated Revert Execution
Anti-Channel Delete	`CHANNEL_DELETE`	Fires when any channel is deleted. Identifies actor; bans unwhitelisted or warns isolated whitelisted.	**Instant Re-Creation:** Clones name, topic, category, NSFW, bitrate, slowmode, and explicit perms.
Anti-Channel Create	`CHANNEL_CREATE`	Detects unauthorized rogue channels created during a raid or mass spam attack.	**Instant Deletion:** Rogue channel is deleted immediately from guild.
Anti-Channel Update	`CHANNEL_UPDATE`	Detects unauthorized permission overrides (e.g. hiding channels or opening hidden channels).	**Permissions Restored:** Reverts all permission overwrites back to snapshot state.
Anti-Role Delete	`ROLE_DELETE`	Detects role deletion. Banned directly if unwhitelisted; token burst defense applies.	**Instant Role Re-Creation:** Clones name, color, hoist, mentionable flag, and exact permissions.
Anti-Role Create	`ROLE_CREATE`	Detects rogue roles created by malicious admins.	**Instant Deletion:** Rogue role is purged immediately.
Anti-Dangerous Perms	`ROLE_UPDATE`	Fires if a role is granted Administrator, Ban Members, Manage Guild, or Manage Roles.	**Perms Stripped:** Strips dangerous permissions immediately to prevent privilege escalation.
Anti-Dangerous Role Assign	`MEMBER_UPDATE`	Fires if an admin assigns an admin/whitelisted role to an unauthorized member.	**Role Revoked:** Automatically strips the role from recipient user.
Anti-Member Ban	`MEMBER_BAN_ADD`	Intercepts unauthorized bans executed by rogue staff or hacked bots.	**Instant Unban:** Victim is automatically unbanned; rogue admin is banned.
Anti-Member Kick	`MEMBER_KICK`	Intercepts rogue member kicks. Rogue actor is banned immediately.	**Alert + Invite:** Discord API cannot force-join members; alert + recovery invite logged.
Anti-Bot Add	`BOT_ADD`	Fires when an unauthorized bot is invited to the guild without Supreme authority.	**Instant Kick:** Rogue bot kicked immediately; user who invited bot is banned.
Anti-Webhook Inject	`WEBHOOK_CREATE`	Detects webhook creation used for mass web-nuke raids.	**Instant Deletion:** Rogue webhook purged immediately; creator banned.
Anti-Server Modify	`GUILD_UPDATE`	Detects unauthorized server rename, icon deletion, splash nuke, or vanity URL change.	**Snapshot Restoration:** Restores server name, icon, and settings from DB.
Anti-Everyone Ping	`MASS_MENTION`	Detects unauthorized users pinging @everyone or @here across channels.	**Message Purged + Muted:** Message deleted instantly; actor timed out/banned.
Anti-Prune	`MEMBER_PRUNE`	Detects mass member pruning attempted by rogue administrators.	**Actor Banned:** Rogue actor banned instantly; emergency lockdown engaged.

4. Complete AutoMod Trigger Specifications

AutoMod Filter	Trigger Condition	Default Threshold	Enforcement & Mitigation
Anti-Mass Mentions	Excessive user or role mentions in a single message	`> 5 mentions`	Message deleted • 10-minute timeout • Logged to Security
Anti-Everyone / Here	Unauthorized use of @everyone or @here in chat	`Non-whitelisted`	Message deleted • 1-hour timeout • Alert to Owner
Anti-Spam / Flood	Rapid message burst from single user	`5 msgs / 3.0s`	Messages purged • 5-minute timeout • Warn issued
Anti-Links / URLs	HTTP/HTTPS links, phishing domains, IP grabbers	`All unwhitelisted`	Message deleted • Warn issued • Phishing domains auto-ban
Anti-Discord Invites	Discord server invite links (discord.gg/*, etc.)	`All unwhitelisted`	Message deleted • 15-minute timeout • Advert log created
Anti-Bad Words	Blacklisted profanity, slurs, regex matches	`Custom & Global List`	Message deleted • Verbal warn • Repeat triggers timeout
Anti-Caps	Excessive uppercase characters in message	`> 70% caps (len > 8)`	Message deleted • Gentle rate warning to user
Anti-Emoji Spam	Mass custom or unicode emojis in message	`> 6 emojis / msg`	Message deleted • User warned
Anti-Zalgo Text	Glitched, corrupted Unicode diacritic stacking	`Zalgo factor > 0.4`	Message purged • User warned to clean font
Anti-Duplicate Text	Repeating identical message across channels	`3 duplicates in 10s`	All copies purged • 10-minute timeout

5. Visual Logging Preview — #shizu-security-logs

Rendered directly with Shizu's obsidian dark palette (#1E1F22 / #2B2D31), clear status badges, and forensic details.

■ SHIZU ANTI-NUKE PROTECTION — #shizu-security-logs • 10:55 AM

Unauthorized Channel Deletion Intercepted
An unauthorized administrator attempted to delete a server channel. Shizu Security intervened immediately.

■ **OFFENDER**
@RogueAdmin
ID: 109876543210987654

■■ **WHITELIST STATUS**
■ **Unwhitelisted (No Bypass)**
Zero-Tolerance Enforcement

■ **ACTION ENFORCED**
■ **Permanently Banned**
Roles & permissions revoked

■ **SELF-HEALING STATUS**
■ **Channel Restored**
Cloned exact permissions & category

■ **TECHNICAL AUDIT DETAILS**
- Target Channel: #announcements (ID: 123456789012345)
- Audit Log Entry: ID 134567890123456 (CHANNEL_DELETE)
- Owner DM Alert: Delivered successfully to @ServerOwner

■ Shizu Security v2.3.0 • Automated Defense • 10:55:12 AM

■ WHITELIST BURST THREAT INTERCEPTED — #shizu-security-logs • 10:56 AM

Compromised Whitelist Account Terminated
A whitelisted staff member exceeded the mass-trigger rate limit (3 destructive actions in 10s). Suspected account token hijacking.

■ **OFFENDER**
@WhitelistedMod
ID: 876543210987654321

■■ **WHITELIST STATUS**
■■ **Whitelisted (Burst Exceeded)**
3 actions within 4.2 seconds

■ **ACTION ENFORCED**
■ **Permanently Banned**
Emergency token defense

■ **RECOVERY STATE**
■ **3 Channels Restored**
All nuked channels recreated

■ **THREAT ANALYSIS**
- Triggered Actions: Channel Delete (x3 within 4.2s)
- Account State: Banned & Roles Stripped
- Owner Direct Alert: Dispatched with URGENT Priority

■ Shizu Security v2.3.0 • Mass-Trigger Defense • 10:56:04 AM

■■ WHITELIST SECURITY NOTICE — #shizu-security-logs • 10:57 AM

Whitelisted User Sensitive Action Detected
A whitelisted staff member performed a protected action. Action was reverted and user was warned.

■ **WHITELISTED USER**
@TrustedMod
ID: 554433221100998877

■■ **WHITELIST VERIFICATION**
■ **Whitelisted (Single Event)**
No mass-burst detected (1 of 3)

■ **ACTION ENFORCED**
■■ **Warned (No Ban)**
Action reversed to protect guild

■ **PROTECTION ACTION**
■ **Webhook Deleted**
Rogue integration purged

■ **EVENT SUMMARY**
- Action Type: Webhook Creation in #staff-chat
- Webhook Name: SpamHook (ID: 99887766554433)
- Owner DM Alert: Dispatched with Warning Context

■ Shizu Security v2.3.0 • Whitelist Guard • 10:57:30 AM

6. Visual Logging Preview — #shizu-mod-logs

Staff moderation actions (bans, timeouts, warns, kicks, purges, channel locks) route cleanly to #shizu-mod-logs.

■ MEMBER TIMEOUT — CASE #1042 • 10:58 AM

■ TARGET USER
@Troublemaker
ID: 998877665544332211

■ STAFF MODERATOR
@HeadAdmin
ID: 1478730719571349545

■■ DURATION
1 Hour (60 minutes)
Expires at 11:58 AM

■ ORIGIN CHANNEL
#general-chat
ID: 77889900112233

■ REASON
Excessive toxicity and continuous spamming after verbal warning.

■ Shizu Moderation System • Staff Action • 10:58:19 AM

7. Direct Message to Server Owner (@owner) — High Priority Alert

Dispatched straight to the personal DMs of the Guild Owner for **EVERY** Anti-Nuke trigger (Log + Warn).

■■ URGENT SECURITY ALERT FOR SERVER OWNER — ACTION TAKEN

■ SERVER: Your Discord Community (ID: 123456789098765432)
An Anti-Nuke trigger was executed on your server. Shizu Security automatically intercepted the event, neutralized the offender, and restored your server's state:

■ TRIGGERED BY
@RogueAdmin
ID: 109876543210987654

■■ WHITELIST STATUS
■ Unwhitelisted User
Instant ban policy applied

■ SHIZU PUNISHMENT
■ Permanently Banned
All permissions revoked

■ RECOVERY EXECUTED
■ Channel Auto-Recreated
Cloned exact position & sync

■ RECOMMENDED OWNER ACTION
The threat has been neutralized and the deleted channel is restored. Please review your server roles. If this staff member was authorized, add them to the whitelist via ?whitelist add @user.

■ Shizu Security 24/7 Shield • Automated Owner Guard • 10:55:12 AM

8. Hierarchy Escalation DM (When Offender Has Equal/Higher Role Than Bot)

■ EMERGENCY HIERARCHY ESCALATION — MANUAL ACTION REQUIRED

■ SERVER: Your Discord Community
An unwhitelisted user attempted a destructive action. The action was **SUCCESSFULLY REVERTED**, but the offender has a **higher role hierarchy than Shizu Security**. Shizu cannot ban this user automatically due to Discord permission restrictions.

- **Offender:** @CoOwner (ID: 991122334455)
- **Attempted Action:** Channel Deletion (#announcements)
- **Revert Status:** ■ **Recreated Successfully**
- **Immediate Owner Action: Please demote or ban @CoOwner manually in your server!**
